Insights

Since the last vet visit

Since Aug 26, 2026:

- Symptoms logged: 1
- Weight: 23.8 → 24.4 kg

- Recent Folate values are trending down (from 28.1 to 18.9 ug/L).
- Recent Cobalamin (B12) values are trending up (from 148 to 611 ng/L).

This is a pattern in the data you entered. It is not a diagnosis or a cause, and does not indicate any disease. Discuss your pet's health with your veterinarian.

Chronology

Every event of the period in date order. Doses given and meals are not repeated here: they have their own sections.

Stools and SC fluids appear here only for the same days as in their own sections.

Stools

306 entries over 96 days · 3.2 per day on average · most in one day: 6.

Stool trend

Score: 1 hard and dry · 3 formed (the good one) · 5 piles up · 7 liquid. One dot for every stool. Entries with no score take it from the consistency; a gelatinous coating carries no score and is written in the row.
